

Electric tractor

Bigà type “B” medium towing

Speed 10 km/h towing capacity 300 kg.

Bigà tractor type B - 10 Km/h solves two problems, the ability to move quickly enough in large spaces and the possibility to carry various goods up to 300 kg attaching easily a Bigà trolley.

You can use it in different production areas, thanks to its speed, easy manoeuvrability in narrow spaces, in fact it can turn around on itself if you use our trolley “Type 1S” for emergency and maintenance, or load heavy and oversize materials (trolley 120x BO, capacity 300kg).

It allows saving a lot of money and time to move oversize material without the need of slow and expensive means.

Technical features

- Headlight and taillights
- Safety button "man on board"
- Reverse gear by lever
- Horn, rearview mirror and battery charge indicator
- Electric gear motor 24 volt permanent magnet 800 watt RR 10/1 800 W - 330 rpm
- Electronic control technology with high frequency Mosfet managed by a microprocessor for the recovery of braking energy
- No. 2 x 12 volt batteries - Traction - 102/157 Ah.
- Built-in or external charger with automatic charge status indicator.
- Traction with chain.
- Differential in aluminum
- Drive shafts with
- Voltage reducer from 24 to 12 volts for lighting system
- Brakes: front disc brakes, rear differential on, parking brake lever on the left and the engine brake with enhanced calibration through electronic control.
- Colors: white, red, green, yellow, blue, black, orange (other colors on request).
